## Digit colour options

Choose colours to match corporate image, to differentiate groups of displays or to suit the ambient lighting conditions.

We offer indoor and outdoor brightness versions.

Red: Traditional, and the most popular colour. The lowest cost colour option, thanks to the high quantity of red displays we make. Ideal for outdoor mounting

Green: Preferred by those who consider red is an alarm colour. Best suited to indoor use, as green is less 'punchy' in direct sunlight.

Yellow: Ideal for outdoor and roadside applications. Good brightness and contrast. A neutral colour just as clear as red.

Blue: Fashionable and 'cool' to the eye. Adds a distinctive and sharp appearance to the display.

White: Entirely neutral, neither warning red or AOK green, or cool blue. Modern, with a retro feel, as the earliest displays used white bulbs.

## Digit sizes available as standard (shown much smaller than real size, to fit on page)

A 'Rule of Thumb' about digit height and viewing distance:- For every 10 metres of viewing distance, you need digits 1" high (The typical width of a thumb). so, if you will be up to 65 metres away, you will need digits at least 7 inches high - round up to the nearest inch.
