## Triple 4-20mA Loop Splitter

- Simple to install and commission
- Clear Plain English operating manuals
- Internal 20V supply to power sensor
- Can scale each output separately
- Low cost and fast delivery
- wide range power supplies

### **Specifications:**

#### Input

Input resistance Input range Excitation voltage

#### Output

Output range Span adjustment Zero adjustment Response speed Isolation Drive capacity Accuracy Temp.Co. 4-20mA, 0-10mA +/-9mA +/-1mA 200 mSeconds 380V to earth and power 600 Ohms per loop

20VDC nom. 28mA max

+/-0.1% span +/-75ppm/C

50 Ohms

4-20mA, 0-10mA

**Note:** All + O/P terminals are internally connected

Power

Supply voltage Power consumption Connections 95-265 VAC or 11-30 VDC 3 Watts max Screw terminals - plug-in

#### Environmental

Working temp. range Storage temp. range Humidity Sealing 0-50 C -20 to 75 C 0-90% rh non-condensing IP40

#### Mechanical

Mounting Size Weight DIN Rail EN50 022 22.5 w x 99h x 111 d 200 grammes

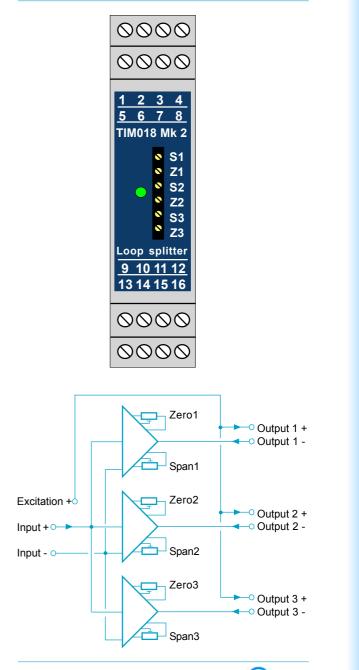

# Model TIM018-Mk2

In many industrial systems, 4-20mA will send measurement values from a transmitter or amplifier to other devices such as panel meters, chart recorders, PLC's, controllers etc.

Often, these devices share the same signal, because they are connected in series.

A **problem** which you may find, is that if any of the devices in the loop is removed, fails, or suffers a wiring fault, all other devices will lose their 4-20mA signal.

The TIM018 helps to solve this problem. It takes one 4-20mA signal and makes 3 copies. Each copy signal can be open circuit or short circuit and will not affect the other loop signals.

## Ordering Code:

TIM018-Mk2-AC for 95-265 VAC TIM018-Mk2-DC for 11-30 VDC UL)ISO9001:2000
